Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent to Kelsey. The reference discloses the claimed apparatus and method to track rest time during exercise and set exercise periods including display 49, 12,14,16, preset buttons 28,36, up/down buttons 22,24,26,34, audio device 56, battery (col.3, line 65), microprocessor 40 having a program associated therewith (col. 4, line 55). The patentee describes the manner of setting custom rest times at col. 4, line 17-49.
2. With respect to the display, no specific type is mentioned. However, an LCD display is well known as one of several display types used in small electronic devices(e.g. watches, calculators) and one of ordinary skill in the art would be familiar with implementation thereof in the Kelsey device.

Art Unit: 2841

3. With respect to claim 4, the mounting methods claimed are conventional methods for attaching small devices to support surfaces and obvious for use in attaching the timer of Kelsey to such surfaces.
